EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Grant Foster on December 16, 2004.

Authorization was given to debit the account for the additional claims fee.

The application has been amended as follows:

Please cancel claim 24.

Please rewrite claim 25 as independent claim 25: A method of measuring moisture in a bulk material, comprising: providing a transmission line comprising in input and an output; embedding the transmission line into a bulk material providing a signal to the input of the transmission line; providing a phase detector, the phase detector being operatively coupled to the output of the transmission line and a reference signal; the phase detector measuring a phase difference between the reference signal and an output signal from the transmission line to determine a moisture content of the bulk material surrounding the transmission line and further comprising:

determining the dielectric constant of the bulk material by the phase difference to measure the moisture content of the bulk material.

Please rewrite claim 26 as independent claim 26: A method of measuring moisture in a bulk material, comprising: providing a transmission line comprising in input and an output; embedding the transmission line into a bulk material providing a signal to the input of the transmission line; providing a phase detector, the phase detector being operatively coupled to the output of the transmission line and a reference signal; the phase detector measuring a phase difference between the reference signal and an output signal from the transmission line to determine a moisture content of the bulk material surrounding the transmission line and wherein the phase detector measures the phase difference using an Exclusive OR gate.

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to André K. Jackson whose telephone number is (571) 272-2196. The examiner can normally be reached on Mon.-Thurs. 7AM-4PM.
